## **Sec. 3.05 USE CONDITIONS AND EXEMPTIONS**

### **C. Traffic Safety Sight Areas; Fences.**

In all zoning districts, fences, walls, hedges or clumps of shrub are to be setback a minimum of ten (10) feet from the edge of the public or private road right of way. In addition, all residential zones, fences, walls, hedges, or clumps of shrubs within fifteen (15) feet of the edge of the public or private road right of way, shall not exceed thirty (30) inches in height measured from the average grade of the center of the road that the lot fronts on. In the case of a corner lot, no fence, wall, hedge, clump of shrubs, or sign over thirty (30) inches high may be placed in the traffic safety sight area. The traffic safety sight area is a triangular area on a corner lot, two of the sides of such triangle being formed by extending two imaginary lines from the corner of the lot adjacent to the street intersection at least thirty (30) feet along each right-of-way line to two points along the sides of the lot parallel to the two intersecting streets, the third side then being formed by the connection of such points. No fence or wall may, in any event, exceed a height of six (6) feet.
