why KgGrass® Classic+?

KgGrass® by ForeverLawn® is the leading synthetic turf solution designed specifically for dogs. KgGrass Classic+ combines durability, realism, and waste-handling functionality to provide a superior pet surfacing solution. ForeverLawn's proprietary knitted backing and PE blades provide 100% "edge-to-edge" drainage at extreme rates. Featuring patented antimicrobial technology, it is designed for odor control and ease of cleaning. KgGrass Classic+ is and has been the ultimate pet surfacing solution since 2006.

classic+ features

knitted backing

providing extreme edge-to-edge drainage and extreme rates (3000"/hour).

easy pick up of solid waste

short, durable polyethylene and nylon blade combo enabling easy pick up.

AlphaSan®
antimicrobial blades.

no infill

infill is problematic because it slows drainage, harbors waste, and makes cleaning difficult.

proven performance
since 2006.

Unfortunately, I did not know about KgGrass and opened with another popular brand of artificial turf, which had a solid urethane backing, holes for drainage, and used infill. Needless to say, it was a disaster and I was soon on a quest to find a higher quality artificial turf. I discovered KgGrass and soon the Karmie Brothers came to my rescue.
