

KÄRCHER

makes a difference

LARGE AREA CLEANING MADE EASY.

Intelligent scrubber with KIK (Kärcher Intelligent Key) system.

B 80 W BP

Excellent maneuverability for large surfaces.

The range of B 80 W BP scrubbers are large but still easily maneuverable. With a robust and maintenance-friendly brush head, they are available with roller or disc brushes in 22", 26" and 30" working widths.

1 4-color LCD display

All cleaning programs are indicated by large easy-to-read symbols on the large 4-color display, along with all major functions: battery capacity with remaining running time in minutes, water quantity, cleaning or transport speed, service interval indicator, dirty water tank full and cleaning agent dosage in percent.

2 Automatic lowering and raising of cleaning head and squeegee

The cleaning head and squeegee are raised automatically for reverse travel and lowered again when you change back to forward travel. This easy and convenient operation save wear and tear on both the cleaning head and squeegee.

3 Automatic water filling (optional)

The Auto Fill In option allows the B 80 to fill with fresh B 80 W. To fill, simply connect a hose with a conventional quick coupling. Filling stops automatically when the tank is full. During filling time the operator can perform other tasks, saving time and money.

4 Flexible Application Control Technology (FACT)

With FACT technology, a Kärcher exclusive, the brush speed of roller brushes can be adjusted to different cleaning applications using three settings. Power Clean 100% - for stubborn dirt and polishing. Whisper Clean 60% - reduces noise levels and ensures long working intervals with low power consumption. Fine Clean 40%, the grey film on so-called fine stoneware tiles can optimally be removed in conjunction with the green roller.
